

Covered Bridge Coffee Roasters

Dear Valued Customer,

We at Covered Bridge Coffee Roasters want to take a moment to inform you about the current state of the coffee market and how it is impacting global coffee prices, including our own pricing.

Since November 2024, coffee prices have experienced significant fluctuations due to a combination of market imbalances, shipping challenges, and extreme weather conditions. Green beans have seen a 40% increase in just one month. The coffee market has also been grappling with ongoing supply chain issues. Both small and large roasters, including ourselves, have faced difficulty securing sufficient green bean inventory, as availability has been limited. Unfortunately, we have no control over weather patterns, and factors such as drought conditions and unusually high temperatures have further reduced our supply of green beans.

In light of these challenges, we want to inform you that moving forward, we will be roasting our coffee on demand, based on the available supply and our ability to source it. As a result, you will see a price increase of up to \$1.10 per pound, which will help offset the rising costs we are facing. Additionally, flash sales will be more limited, so we encourage you to take advantage of these opportunities while they are available.

We truly appreciate your continued support and understanding during these difficult times. Rest assured, we remain committed to delivering the highest quality coffee and service that you have come to expect from Covered Bridge Coffee Roasters. Thank you for being a valued part of our community.

Sincerely,

Tracey Cramer
